EXAMINER'S AMENDMENT

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/24/2010 has been entered. Claims 124-136 and 138-140 are currently pending in the application. An action follows below:
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
3. The application has been amended as follows:

Replace the old Abstract with the following Abstract.

New Abstract:

-- A method of moving the cursor is used in a computer system having a processor operatively coupled to a cursor control device having a light source and an image sensor for optically tracking motion of the cursor control device. The method is executed to move the cursor according to an enhanced tracking value generated based on a measured tracking value, a projected tracking value, and a tracking confidence value based on an illumination value representative of an intensity of light sensed by the sensor.--

In the Specification:

Insert the following text as the first paragraph of the Specification:

-- CROSS-REFERENCE TO RELATED APPLICATIONS

The present application is a 371 of PCT/US03/40895 filed December 22, 2003, which claims the benefit of U.S. provisional application No. 60/435933, entitled "Cursor Control Device," filed December 20, 2002, by inventors Donald P. Bynum and Gregory A. Magel. --

4. Claims 124-136 and 138-140 are allowed.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a method of moving the cursor used in a computer system having a processor operatively coupled to a cursor control device, which has a light source and an image sensor for optically tracking motion of the cursor control device. Independent claim 124 identifies the uniquely distinct feature, "generating an enhanced tracking value representative of a sum of the tracking confidence value multiplied by the measured tracking value and a value of (1-the tracking confidence value) multiplied by the projected tracking value" in lines 14-17. The closest prior art, Norskog et al. (US 6,795,056 B2) discussed in the Office Action dated 09/15/2009, either singularly or in combination, fails to anticipate or render obvious the above underlined feature associated with other features of these claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jimmy H. Nguyen whose telephone number is 571-272-7675. The examiner can normally be reached on Monday - Friday, 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached at 571-272-7681. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
